

ASSOCIATE OF SCIENCE IN TEACHING

The A.S. in Teaching degree prepares students to succeed in a teacher education degree program. Students will complete the foundations of education courses needed to move directly into the Teacher Education Program at UW-Superior in a cost-effective and learner-centered environment. Students will also receive individualized academic advising to help them transition into the Teacher Education Program. Completion of the AS degree satisfies University Studies requirements at other University of Wisconsin System universities.

The AS degree does not lead to teacher licensure but does prepare students to transition into a teacher licensure program. Admission to the Teacher Education Program at UW-Superior is also contingent upon a cumulative grade point average minimum of 2.75, submission of criminal background check (CBC), a P in T ED 100 Orientation to Teacher Education, and a B in T ED 200 Introduction to Education.

Programs

- Teaching, Associate of Science

Student Learning Goals

- **Communication:** Students will understand and be understood by others to share meaning through diverse modes, including listening, reading, visualizing, speaking, performing/presenting, creating, and writing.
- **Individual and Social Responsibility:** Students will engage in personal development, interpersonal competence, and social responsibility through active learning.
- **Creative and Critical Thinking:** Students will engage in creative and critical thinking and practice based on multiple forms of evidence, processes, and diverse perspectives.
