

ARTIFICIAL INTELLIGENCE (AI) ESSENTIALS CERTIFICATE

The Artificial Intelligence (AI) Essentials Certificate is a 3-credit course designed for learners who want to build strong, non-technical artificial intelligence skills that support today's workforce needs. Through a series of interactive Zoom-based workshops and course assignments, you'll explore core AI concepts, everyday tools, ethical and legal considerations and effective strategies for boosting productivity with AI. This certificate provides opportunities to learn with peers who are actively building AI skills and to connect with small business owners and industry professionals using AI in real-world settings. By the end of the program, you'll have a practical understanding of how AI works and how to apply it responsibly and efficiently in professional environments.
